

Backend Web Development

(12th - 14th November 2021)

The Backend Web Development workshop covered core Java along with its basics. The first day was mostly about the fundamentals of Java, while the rest will focus more on professional skills development. Maven, DTO Layer, and Dependency Injection were some of the topics which were addressed. The exciting sessions came to an end with an even more interesting project.

The screenshot shows a Google Meet interface. At the top, a browser window displays the URL `meet.google.com/mey-eegv-yjg`. Below the browser, a status bar indicates 'Tathagata Bhattacharyya is presenting'. The main area shows a PowerPoint presentation titled 'How Website Works' with a slide titled 'DOMAIN NAME SYSTEM (DNS)'. The slide contains a diagram illustrating the flow: Visitor (yourdomain.com) → DNS Servers (IP: 192.234.14.32) → Web Host (HostGator). A 'Domain Registrar' (GoDaddy) is also shown. To the right of the presentation is a grid of participant avatars. The participants listed are: Tathagata Bhattacharyya, Sourav, 20-CSE-155 SHRUTI D..., Prati Banerjee, Pushpendra Kashyap 70, 20-CSE-168 Subhadip..., Abir Adhikari, and 86 others. At the bottom, a control bar shows the time '18:14', the meeting ID 'mey-eegv-yjg', and icons for mute, video, chat, and end call.
