

Web Development with HTML, CSS, JavaScript

(13th- 15th May 2022)

The workshop was designed to encourage participants to use their imagination to create wonderful websites. With inventive minds assembled, the workshop began with a brief introduction to creating web pages and designing them with the use of CSS. On the following day, the students were made familiar with HTML, CSS, and JavaScript. Under the guidance of the instructor, a project was created by the students to demonstrate the skills they had acquired, and the workshop came to an end with a quiz contest.
